

Fall 2020 Remote Learning Celebrations

We came in rallying and ready for the day. Preparation was key to a successful day today!

Mr. Vigil: As terrified as I was to go back to remote learning, today went very smoothly for me! I'm glad we were prepared. In addition, our birthday lunch was delicious. Thanks to all who contributed!

D. Armstrong: I was able to use Jamboard to teach part of an essay, and my students really took to it and made the activity their own. I am VERY excited to see how their essays turn out now!

Sarah Smith: My students were actively engaged yesterday and most of them wanted to stay the whole hour and work even after given the option to get off Google Meets. I was impressed by their work ethic yesterday!

Koch: I had some real tech issues yesterday with 4th period, but they were so gracious and stayed on the meet until I could rejoin them and finish class. I was so frustrated, but they were so sweet about it.

I had great help and we did the first two days of lunches for our kids!

Jenn Pointon: Everyone showed to my first hour Senior Seminar. The students helped to remind their peers to get on when they were not in class.

Cumbie: I was impressed with my students and their work ethic. Watching them interact with each other was awesome! I got off to a shaky start 1st hour and couldn't get Google Meets to work for me but my student stayed the course and we got on Zoom and had a good learning experience. Thanks to Ms Pointon I was up and running on Google Meets by the next class.
